Core competences

Education pursues a main aim, specially in our context: students coming out of prison must be able to face the difficulties and basic and minimum requirements that society demands. This set of skills, knowledge and attitudes are called Core Competences.

Core Competences

- * Linguistic Communication Competence: verbal and written use of Spanish and Foreign Language to communicate.
- * Mathematical Reasoning Competence: using and interpreting information to solve daily life and work related problems.
- * Knowledge and Interaction with the Physical and Natural World Competence: ability to understand actions and predict consequences regarding people's health and the environment.

Core Competences

- * **Digital and Information processing Competence:** ability to search, get, process and transfer information and turn it into knowledge by using ICT.
- * **Social and Civic Competence:** ability to understand the social reality of the world we live in and practise democratic citizenship.
- * **Cultural and Artistic Competence:** ability to critically value artistic and cultural expressions.

Competences for the Communication Area

- * Linguistic Competence.
- * Digital and information processing Competence.
- * Cultural and artistic Competence.
- * Autonomous and continuing learning attitudes and Competence.

Core Competences

- * Autonomous and continuing learning attitudes
Competence: ability to start and keep learning more and more effectively according to one's own aims and needs.
- * Autonomy and personal initiative
Competence: ability to carry out what has been decided/chosen and feel responsible for that. Also, being able to create, plan, develop and assess a project.
